Subject: CSD Presentation to Chris K.

Hi Dean:

I think this is the order in which I plan to present the data that you have mapped on CSD:

1. Background – Constructed in October 2007 started operating in 2008 – Well data showing the results of the well testing.
2. Show CSD Production area and Land Application fields under CSD's control
3. Production Area wells – show high levels of Nitrates
4. Private wells – levels of high nitrates
5. Plan to add transects and measure the water table and collect samples for pollutants in the groundwater flow.
6. Add a tracer to show groundwater is a conduit to surface water – Lake Petenwell.

Please let me know if you have any thoughts on the order I have below on presenting the data.

Sincerely,

Cheryl Burdett
